FOR IMMEDIATE RELEASE

iDashboards Announces Release of Version 4.0 with Business Activity Monitoring

TROY, Mich. --Mar. 15, 2006-- iDashboards (www.iDashboards.com) announced today the release of Version 4.0. iDashboards is a web-based dashboard application with award winning engineering and patented technology to give it compelling advantages. iDashboards software helps companies leverage their information assets through visually rich, responsive, and personalized Business Intelligence dashboards to analyze, track, and drill-down through a wealth of information. iDashboards 4.0 also provides real-time Business Activity Monitoring of Key Performance Indicators (KPIs) through email and dashboard alerts.

"iDashboards 4.0 is a solution you simply have to see to believe. This is an enterprise class solution that has a strong ROI with a low total cost of ownership. iDashboards is the most interactive and intuitive Business Intelligence solution available. And the BAM Module will take your business from reacting to dashboard KPIs to proactively managing by exception," exclaims iDashboards 4.0 Beta customer.

Some of the new key features of iDashboards 4.0 include:

- ❏ Patented Synchronous Chart Highlighting - Make charts more interactive and more effective
- ❏ New Chart Types - Includes new speedometers and real-time ticker
- ❏ Chart Notes - Enables users to have "sticky notes" displayed on charts
- ❏ Customized Region Maps - Define regional maps with different state groupings
- ❏ Single Sign-on - Integrate with any web-based application
- ❏ Full Support of All Relational Databases - Oracle, IBM DB2, Microsoft SQL Server, etc.
- ❏ Data Source Privilege Matrix for Groups – Provides the ability to associate one or more data source visible to a user group

iDashboards 4.0 has two additional add-on modules available:

- ❏ Business Activity Monitoring - Monitor metrics with real-time alerts to business users through email and dashboards
- ❏ Data Services API - Allows a programmer to create a data connection between iDashboards and any arbitrary data source that needs displayed through charts

About iViz Group

iDashboards is the flagship product of iViz Group. iViz Group is a privately held Delaware corporation with a mandate to develop truly cutting edge data visualization and dashboards. Effective visualization can make the difference between information overload versus information insight. iViz Group's mission is to enhance Business Intelligence through Dashboards with Visual Intelligence.
