

“iDashboards holds people accountable in an incredibly timely manner. We are continuing to find new ways to use it.

—Laurel Schedin, Director of Informatics

VMC Director attributes \$2 Million Annual Budget Savings to iDashboards

CUSTOMER

University of Minnesota's College of Veterinary Medicine (VMC) is dedicated to improving the health and well-being of animals and people, while providing high-quality education, conducting cutting-edge research and delivering innovative veterinary services.

CHALLENGE

VMC required a dashboard solution that had the ability to graphically display the UVIS system data, being captured in their Oracle database, in an easy-to-read format. They also needed a system with role-based security which would enable management teams and directors to have individual logins to view pertinent information.

SOLUTION

Due to its intuitive interface and role-based permissions, VMC chose iDashboards. With the use of iDashboards, they have been able to develop custom dashboards for revenue, visits, medical records, appointments, inpatient status, client appointments and much more.

RESULTS

VMC has been able to implement dashboards in their diagnostic lab to monitor testing, quality control, grant submissions, acceptance rates and testing turnaround time. In addition to these dashboards, their development team uses dashboards for donor prospectus and sends real-time alerts for high donor visits and new appointments to the direct managers.

Other student affairs dashboards allow the Associate Dean to track student competency and faculty performance. The student competency dashboard reveals students' performance, which provides the Associate Dean a method to determine at-risk students and implement early intervention. The dashboards also match student skill sets with potential specialists. The faculty dashboards allow the Associate Dean to monitor faculty grade turnaround time and student feedback to ensure students are receiving the best education possible.

VMC has been using iDashboards for a number of years and has discovered a budget savings of \$2 Million per year. With iDashboards innovative, easy to use dashboards, VMC continues to find additional ways to implement dashboards in their Veterinary Medicine College to increase financial support and better their students' experience.
